Rated power
147 kW / 2100 rpm

Operating mass
25500 kg

SANY

For challenging tasks, you need a first-class partner

Quality comes from experience. And from new ideas. This is why we combine these two crucial factors at SANY. This is because we are one of the leading producers, having sold more than **450 000** excavators **worldwide**. This means that you can always rely on sophisticated products that have been tried and tested in practice. An impressive **5-7 %** of our annual turnover is dedicated to research and development. This is why we give you not only our word, but also our extraordinary **four-year warranty** as a guarantee of how powerful and robust our products are.

175 kN

Max. arm digging force
120 kN

Slewing speed
10.6 rpm

Max. travel speed
5.4 km/h

THE SPECIALIST WHEN IT COMES TO VERSATILITY

With the SANY SY245H crawler excavator, you get more done. No matter where used – it applies its power with precision. This is because every detail is specifically designed for the tough conditions on construction sites. This excavator is a real all-rounder and a specialist in every discipline, from quick loading to precise digging and powerful demolition work.

What particularly sets it apart is its ability to control its tremendous power with great precision – for maximum productivity and therefore a fast return on investment.

TOP PROPERTIES

ECONOMY

IT IS AS LOW IN CONSUMPTION AS IT IS POWERFUL IN PERFORMANCE

The highly efficient engine with common rail technology guarantees excellent performance. Four different operating modes for the various operating conditions precisely adjust the engine and hydraulic power to the requirements. This improves the excavator's response behaviour. Fuel consumption and emissions, which were already very low, have been

further reduced to meet the latest Stage V emissions standard. Another benefit ensuring higher efficiency whilst reducing component costs is the fact that the machine still operates without an exhaust gas recirculation system.

DIMENSIONS

Agile power – the SY245H works through its programme quickly and with great power. This excavator has great power reserves in its 23+ tonnes. The machine is mounted on a stable HD undercarriage so that it can be used to the full.

USER EXPERIENCE

Comfortable workstation – the cabin of the SY245H leaves nothing to be desired. All of the controls are within easy reach from the air-suspension seat which supports the driver's back. **Maintenance and service support** is also easy to reach: Thanks to the large and easily accessible service doors and clear layout of the most important components, this work is **quick and easy** to complete.

QUALITY

Durable and robust – the SY245H can be used whenever the going gets tough. This means that it must be able to withstand a great deal. No problem for the SY245H, as with its reinforced, **extremely robust undercarriage** and particularly clean, **robot-welded seams**, it is exactly the right excavator for hard day-to-day work on construction sites.

SAFETY

Safety as a production factor – it is only possible to work cost-effectively if you work safely. This is why the **large safety package** has everything included **as standard**, from LED working lights to the rotating beacon, and from the boom safety valve to the overload warning for lifting

COMPONENTS

High quality and tried-&-tested – the water-cooled Cummins diesel engine with common rail technology and AdBlue system guarantees **reliable performance**, even under tough working conditions. The complete package is rounded off by the finely tuned Kawasaki hydraulic system.

ECONOMY

Power and efficiency – the smart hydraulic control system adapts the pump power to the available engine power. This means **greater efficiency** and **lower fuel consumption**, thereby providing excellent **cost-effectiveness**.

ECONOMY

Cost-effectiveness thanks to maximum flexibility

Whether digging, loading, demolishing, transporting, hammering, or performing other tasks, the SANY SY245H tackles a wide range of tasks without compromise – and without long changeover or waiting times. The pre-installed quick-coupler line means that many attachment devices can be fitted. Various working modes ensure optimum efficiency at all times.

ECONOMY

Changed well

The hydraulic quick-coupler line is already included ex-works as standard and is incorporated into the operating concept. The powerful hydraulic system is factory-equipped with numerous functions that help the crawler excavator achieve maximum flexibility. In addition, one of the machine's new features makes changing tools even easier and quicker. When switching from hammer to shear hydraulics, the hammer valve is switched by pressing the key on the display. The attachment devices can therefore be switched completely from the cab, in conjunction with the respective quick coupler systems.

Absolute reliability – for peace of mind!

SANY's four-year warranty* gives you the assurance that you can fully count on your equipment.

* With participating partners

EFFICIENCY, COST-EFFECTIVENESS AND USER EXPERIENCE

USER EXPERIENCE

THE NEW COMFORT ZONE

For drivers to fully concentrate on their work, they first need to be sitting comfortably. The individually adjustable, air-suspension seat offers a comfortable workstation from which all of the controls are within easy reach. At the forefront, alongside the ergonomic controls, is the 10" touch display. This displays razor-sharp images from both cameras, and has intuitive controls which allow all relevant machine parameters to be set with great ease, in all common European languages. Naturally, the consoles move up and down with the seat, thus providing the best possible protection for the operator even in the event of impacts. The flat design of the engine cover allows a view of the rear working area.

The automatic climate control system which provides pleasant temperatures even in the summer, the powerful heating, and the radio with an additional USB port for the driver's own audio devices all comes as standard, as do the large storage compartments for everything the driver needs close to hand.

COMPONENTS

Improved performance thanks to optimised hydraulics

The position-controlled hydraulic system adjusts the required pressure and oil flow according to requirements. The powerful, variable piston pumps reach a flow rate of 520 l/min and therefore achieve a very high level of efficiency at a low engine speed.

Our highlights – the added benefits SANY offers you:

- + Large, high-resolution touch display
- + Reverse camera
- + Seat with adjustable consoles
- + 5 different attachments per category programmable (name, pressure, oil flow)
- + 2 proportional control circuits as standard
- + Comfortable switching of hammer/shear hydraulics

USER EXPERIENCE

Minimising maintenance times and maximising operating times

All serviceable components are easily accessible. This means that any maintenance and service support can be carried out efficiently and safely, reducing unproductive downtime and increasing machine availability.

Daily routine checks in particular can be carried out quickly, easily and safely by hand, because handrails, non-slip treads. A lot of maintenance tasks, such as cleaning the air filter, are already possible from the ground.

QUALITY

A very stable foundation

The machines have a great deal of work to do during their tough day-to-day work on construction sites. This is why – from the design stage, to selecting the materials used, quality and conducting the final checks – all excavators by SANY are designed to be robust. For instance, all welded seams are computer-controlled by robots – this maximum precision ensures stability and reliability.

SAFETY

Best visibility even in poor lighting conditions

Good visibility is required for precise, quick work. In the worst-case scenario, the SY245H itself will provide sufficient lighting. The operating area is illuminated by two LED roof working lights, two LED working lights on the boom, one in the upper structure and an LED working light facing backwards. The high-quality LED working lights not only stand out thanks to their particularly good illumination, but also due to their low power consumption and extreme durability, while also being virtually maintenance-free. For enhanced safety, a reverse camera is also provided to show all poorly visible areas of the machine. With a single tap, the images can be combined or shown individually on the high-resolution display.

TECHNICAL SPECIFICATIONS

MOTOR

Model	MITSUBISHI D06FRC
Type	Direct Injection, 6-cylinder, 4 stroke with turbo charged and water-cooled
Exhaust emissions	Stage III
Rated power	147 kW / 2 100 rpm
Max. torque	750 Nm / 1350 rpm
Displacement	6.373L

HYDRAULIC SYSTEM

Mainpump	Adjustable axial piston pump
Max. oilflow	520 l/min
Travelmotor	Adjustable axial piston pumps
Slewing Gear	Adjustable axial piston pumps

PERFORMANCE

Slewing speed	10.6 rpm
Max. travel speed	High 5.4 km/h, slow 3.4 km/h
Max. travel force	191 kN
Gradeability	35°
Groundpressure	52.5 kPa
Bucket digging force ISO	175 kN
Arm digging force ISO	120 kN

1. The lifting capacity is calculated in accordance with ISO 10560 and SAE J1097, where limit coefficient of hydraulic system is 0.87 and tilting limit coefficient is 0.75;

2. The item with the mark * is limited by hydraulic pressure and the item without the mark "*" is limited by stability;

3. Lifting point is front support hole of bucket rod (excluding the weight of bucket). It is necessary to deduct from the above lifting capacity if additional accessory is installed such as bucket etc.

DIMENSIONS

Parts supply – quick and reliable

With the purchase of a SANY crawler excavator you have made an investment in the future. Fast availability of spare parts is your guarantee of minimal downtimes and failure times.

THE ALLROUNDER THAT PICKS UP EVERYTHING

The SANY SY245H is a powerful all-rounder which combines flexibility and power. It can therefore perform various tasks in a wide range of applications and its robust design means that it is comfortable even with difficult tasks and tough environments.

SAFETY AS A PRODUCTION FACTOR

The cleverly designed cab structure allows an unobstructed view of the working area, and the **reverse camera that is fitted as standard** provide a good overview. The LED lighting system is essential for long working days. Alongside this, optimised access to all maintenance points ensures maximum safety at all times.

COMFORTABLE WORKSTATION

You know there are good **ergonomics** when you can still concentrate on your work after several hours. No problem in the cockpit of the SY245H because the seat and controls have been **designed for practical requirements**. All the machine settings can be configured using the high-resolution touch screen which is easy and intuitive to operate.

HIGH QUALITY AND TRIED-AND-TESTED

With its maximum torque of 750 Nm at 1350 rpm, the very strong **Mitsubishi D06FRC, six-cylinder engine** brings an incredible amount of power.

DURABLE AND ROBUST

The SY245H has to endure a lot in its tough daily construction site work. But it is well prepared for this. High-quality materials and meticulous machining provide the foundation for its long service life: For example, the **reinforced undercarriage** and **precise, welded seams**. Maximum stability designed to last many decades is also guaranteed by the **continuous plate on the underside of the boom**.

AGILE POWER

The SY245H works through its programme quickly and yet powerfully. This excavator has huge **power reserves** in its 25+ tonnes. The machine is mounted on a **stable HD undercarriage** so that it can be fully utilised.

EFFICIENCY AND POWER

The **smart hydraulic control system** adapts the pump power to the available engine power. This reduces fuel consumption, engine wear and exhaust gas emissions. **The comprehensive standard functions** of the hydraulic system make the machine perfect for virtually all tasks.

TECHNICAL HIGHLIGHTS

Engine	MITSUBISHI D06FRC
