MINI EXCAVATOR RANGE

# SY26U

The independently developed intelligent control system matches pump output to available engine power for greater hydraulic system efficiency and lower fuel consumption. SY26U reduces fuel consumption by 11-21.8 per cent. (Statistics based on the testing ground result. The test data under different operating conditions may be different from this data.)

- » Zero tail swing radius and independent boom swing allow operation in extremely confined spaces
- » The independently developed intelligent control system matches pump output to available engine power for greater hydraulic system efficiency and lower fuel consumption
- » Load sensing hydraulic system for excellent efficiency & performance
