

MINI EXCAVATORS

**SY16C** 

Engine
Yanmar 3TNV80F
Rated power
14.6 kW / 2400 rpm
Bucket capacity
0.04 m³
Operating mass

# SANY

# For challenging tasks, you need a first-class partner

Quality comes from experience. And from new ideas. This is why we combine these two crucial factors at SANY. This is because we are one of the world's leading producers, having sold more than 170000 excavators in 10 years. This means that you can always rely on sophisticated products that have been tried and tested in practice. An impressive 5–7% of our annual turnover is dedicated to research and development. This is why we give you not only our word, but also our extraordinary five-year warranty as a guarantee of how powerful and robust our products are.

170000 EXCAVATORS SOLD IN 10 YEARS

FIVE-YEAR WARRANTY\*

Quality Changes the World

# **SY16C**

# COPES WELL WITH LITTLE SPACE

Whenever things get tight, the SANY SY16C mini excavator is just right. Measuring just 980 mm in width, it even fits through narrow passages, making it the ideal solution for garden and landscaper construction and for work directly on buildings or in existing buildings. Its outstanding equipment is also impressive — take, for example, the width-adjustable chassis, the versatile proportional hydraulics of the auxiliary control circuit or the bright LED work lights.

Weighing in at just 1750 kg and with a transport height of only 2420 mm, it is also very easy to transport, can be loaded and unloaded quickly and impresses on site with its excellent manoeuvrability in confined spaces. At the same time, it does not compromise on efficiency in any way – for example, it stands out with a maximum horizontal reach of up to 4000 mm. It is also available in cab version in the SANY SY18C version.

#### QUALITY

Robust and durable – the most important protective elements and reinforcements as well as all cladding parts are made of high-quality metal, ideal for tough use in the construction industry.

#### **DIMENSIONS**

**Lightweight and compact** – the SY16C fits easily onto standard car trailers and can be transported quickly to any location, even where space is tight.

#### **USER EXPERIENCE**

**Extremely comfortable** – from easy access to the comfortable seat and the ergonomically designed controls, drivers can look forward to maximum comfort.

#### **SAFETY**

No compromise – the SY16C is fully equipped for precise, safe working even in very confined application conditions. In addition to the standard rotating warning beacon, this also includes the battery disconnection switch and an emergency stop button.

#### **COMPONENTS**

**Quality as standard** – the SY16C already comes with extensive features as standard. In addition, it features core components such as the engine and pumps from renowned brand manufacturers like Yanmar and Casappa.

#### **ECONOMY**

Economically impressive – low procurement cost, economical consumption in compliance with emission standard 5 and straightforward maintenance which is attractive. When it comes to costs, SANY mini excavators really are mini.

# AS PRECISE AS BY HAND - ONLY MUCH QUICKER

Mini excavators in particular require high operational flexibility. In this regard, the SY16C is simply unbeatable. It also has a powerful hydraulic system that gives it the necessary power. Together with the precise response behaviour of the hydraulics and chassis, this makes it a perfect precision tool.

#### QUALITY

# Fully resilient – metal access panels

Durability and robustness are standard features on all SANY mini excavators. For example, the access panels parts are made exclusively of metal. This makes them particularly robust – and if a bump happens during the tough everyday work on a construction site, it can usually be repaired. This is what we mean by sustainability.

#### **DIMENSION**

# Adjustable track frame to suit all your requirements and increase stability

When things get really tight, the SY16C makes itself very small – with a width of just 980 mm, it can even fit through a garden gate, a door opening or onto a trailer for transport. If stability is required, the chassis can be hydraulically adjusted to a width of 1350 mm. The dozer blade can also be adjusted to the respective width.

# SANY PLUS ADVANTAGES

#### The added benefits SANY offers you:

- + Proportional auxiliary control circuit via joystick operation as standard
- + LED work lighting
- + Canopy only with Cab option
- + Load-sensing hydraulic system
- **+** Emission standard Stage V

04

#### EFFICIENCY, COST-EFFECTIVENESS AND USER EXPERIENCE

#### SAFFTY

#### **Protection for people and machines**

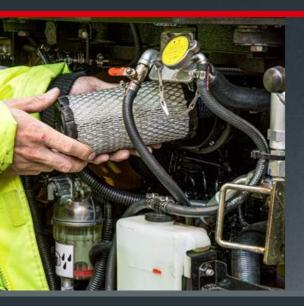

Thanks to the ROPS or FOPS-tested operator's platform, SANY's smallest model also performs well in terms of safety. To ensure that people and machines, tools and buildings and the environment are optimally protected, the standard equipment includes a battery disconnection switch and an emergency stop button. The rotating warning beacon and the travel alarm helps the operator to pay attention to their work during operation.

#### COMPONENTS

#### The individual that already has everything

Many things that are good are already standard with the SY16C. For example, the LED work lights that guarantee optimum views in all conditions. Or the sophisticated load-sensing hydraulic system with precise power adjustment to meet current requirements.

#### USER EXPERIENCE

#### Maintenance done the easy way

Only a well maintained machine can do a good job. Therefore, all maintenance-relevant parts of the SY16C are easily accessible from ground level. This saves time and money during regular inspections and all maintenance work and increases availability.

The fuel tank is also easy to reach – but with a tank capacity of 23 litres and low fuel consumption, you do not need to refuel as often anyway.

#### ECONOMY

### Your very personal little economic miracle

For great performance in the smallest of spaces, you need a real powerhouse: Agile and extremely compact, flexible and precise. The SY16C gets to the heart of maximum power – for quick and clean results where only manual work would otherwise be possible. This makes it a highly efficient tool. In addition, the SY16C offers an attractive priceperformance ratio at the time of purchase and then in terms of operating costs.

# Absolute reliability – for peace of mind!

SANY's five-year warranty\* gives you the assurance that you can fully count on your equipment.

\* With participating partners

# THE FINE DIFFERENCE: OPEN FOR ALL SANY SY18C

Same technology, same performance – the SY18C differs from the SY16C only in that it is equipped as a cab insted of a canopy. It therefore weighs slightly more just 1850 kg. The cab variant offers a perfect view outside of the work area while meeting current ROPS requirements.

and reliability of our service products. This underlines our happy to help you with a comprehensive range of services to equipment's performance in terms of their durability and their ensure that your machine continues operating efficiently in the

#### SANY - flexible, fast and always there for you

Rapid assistance, tailored advice and a reliable supply of original parts - that is what we mean by a premium service.

#### The added benefits SANY offers you:

- + Fast supply due to central located parts warehouses
- **★** More than 15,000 spare parts to make your machine highly reliable
- + Expert knowledge for optimal supply for your
- + Thanks to SANY's special training programme, our dealers are always kept up-to-date so that they can face all technical challenges.

#### **Detailed information in black and white**

Handbooks and documents are available for all SANY mini excavators, and these can help you with operation, maintenance, servicing and repairs. These include operating and maintenance instructions and technical specifications.

#### HIGHLIGHTS **SY16C**

# EFFICIENT PERFORMANCE IN MINI FORMAT

Their extremely simple handling and flexible, precise operation make the mini-excavators a highly productive tool for every job. As lightweight machines with compact dimensions, they can also be transported quickly and easily to the place of use.

#### **ROBUST AND DURABLE**

The most important protective elements and reinforcements as well as all cladding parts are made of **robust metal**. **Robotic welded components** guarantee a long service life under all conditions.

#### **EXTREMELY COMFORTABLE**

Impressively simple thanks to the joystick, which is easy to operate with high precision, and the clear display.

#### **NO COMPROMISE**

In order to provide the best possible protection for both people and machines, devices such as cylinder guard plates are already integrated. It goes without saying that the platform is ROPS or FOPS certified.

#### LIGHTWEIGHT AND COMPACT

**Chassis** adjustable in width – from extremely narrow when manoeuvring to wide for the best possible stability.

#### **ECONOMIC**

The intelligent control system adapts the pump capacity to the respective demand for greater efficiency and reduced fuel consumption.

#### **QUALITY AS STANDARD**

High-quality components from brand manufacturers guarantee top performance and a high level of operational safety – also for the **extensive standard equipment**. For example, these include the auxiliary control circuit, LED lighting and even the radio on cab machines.

#### **TECHNICAL HIGHLIGHTS**

| Engine            | Yanmar 3TNV80F                          |  |
|-------------------|---|--|
| Rated power       | 14.6 kW / 2400 rpm                      |  |
| Max. torque       | 64.7 Nm / 1800 rpm                      |  |
| Max. travel speed | 3.8 km/h                                |  |
| Swingspeed        | 10 rpm                                  |  |
| Mainpump          | Variable displacement axial piston pump |  |
| Max. oilflow      | 48 l/min                                |  |
